DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims and 8 of U.S. Patent No. 6,709,088. Although the conflicting claims are not identical, they are not patentably distinct from each other because the scope of claims 1-4 of the present application is the same as scope of the Patent 6,709,088.

With respect to claims 1-4, claim 1 and 8 of Patent 6,709,088 discloses all the limitation of claims 1-4.

Allowable Subject Matter

3. Claims 5-13 are allowed.

- The primary reason for the allowance of claims 5-13 is the inclusion of the limitation of an ink jet print recording device comprising a control circuit that instructs the recording device to operate in a first printing mode when an amount of ink discharged onto the first hole is greater than a predetermined amount and herein in the first printing mode, the recording head discharges ink onto the recording medium and does not discharge ink into the first hole. This limitation is found in each claim, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.
